BOXSPRING BEDS

Every year the culture of healthy sleep is attracting more and more followers - people who appreciate benefits of comfortable sleep as a tool of energy recuperation. Quality sleep and relaxation gives us health and stamina for the whole day.

And in order to make the right choice of bed where we daily spend at least 8 hours one should first thoroughly research the options.

State of the art structure

The first distinctive advantage of boxspring beds over its structural predecessors is an advanced multi level orthopedic support and comfort structure. For maximum effect its base has a like mattress boxspring block. This structure provides your bed with additional amortization. It also ensures much longer life of the mattress and bed as a whole since during the use the structure compensates and distributes the load evenly.

The topper gives you additional protection and comfort and dramatically extends service life of the whole sleep system.

Comfort

Minimum height of over 60 centimeters provides additional convenience. It's easier to lie down on such bed and to get up from it. When you get up in the morning you better not strain your relaxed spine and the mattress height of the bed takes care of that. Visually the sleeping area impressively raises you over the surrounding space thus creating truly royal sensation.

Style

The boxspring bed has a huge design potential. You can design you bed and bedroom in sophisticated minimalism or unique elegance or create posh refinement with the assistant of some decorative elements. This bed can express your creative ideas and smoothly blend into your finished bedroom space and add harmony and comfort to your home.

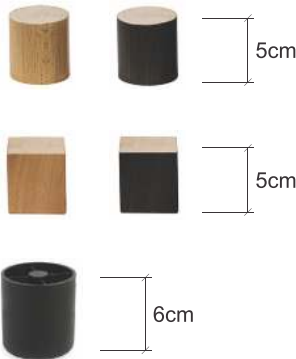

Practicality

In addition to high comfort boxspring beds are a really practical choice. Their design gives wide options for sleeping space solutions. Their structure ensures longer service life. But even if we plan to use the bed for a very long time we must admit that its upper layer will need replacement after some years. And in case of the boxspring bed you will only need to replace the topper which is only a fraction of the whole mattress cost. And you will have the revamped sleeping system for minimal cost.

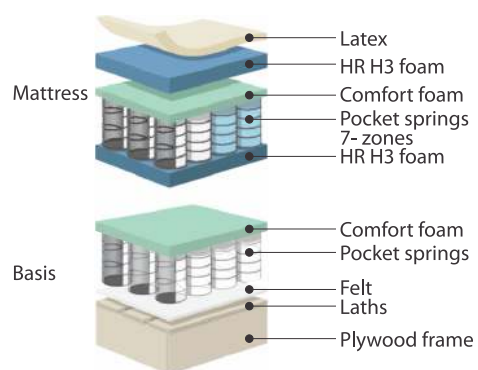

VENERA

Venera boxspring bed is a classic and elegant model with a distinctive padded headboard. It has a high comfortable mattress but on the whole the bed looks sophisticated and elegant. Its cozy mattress is a pocket spring 7-zone system with a special latex layer and winter/summer sides.

Sleeping area height is 65 centimeters.

Bed composition:

MATTRESSES WITH LATEX

- **Comfort**

The unique latex mattress structure allows you to relax and sleep comfortably.

- **Orthopedic effect**

The mattresses have a pronounced orthopedic effect, evenly distribute body weight, and also contribute to normal blood circulation in the sleeper.

- **Antibacterial**

In latex products there is no occurrence of mushrooms, buds, mites and other saprophytic microorganisms that cause allergic reactions and respiratory diseases.

- **Ventilation**

Transparent latex mattress structures provide free air circulation, and do not absorb odors.

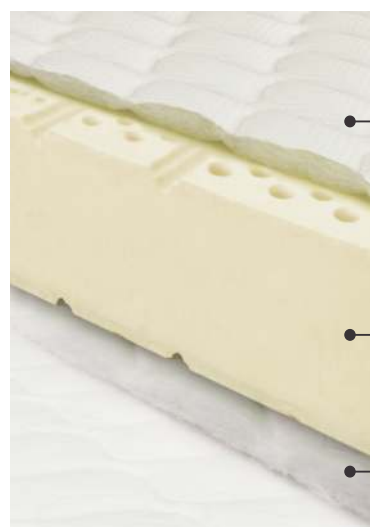

- **Durability**

Latex mattresses are resistant to deformation and do not form dents after prolonged use.

All fabrics undergo heat treated thus obtained the properties of antibacterial products.

MATTRESSES WITH POLYURETHANE FOAM

The application of modern technologies in the production of polyurethane foam provides resistance, flexibility and durability of these materials. The main advantage of the mattress made of polyurethane foam is the smooth air flow. The foam also matches the shape of the human body. Provides strong support, but with the elasticity and softness.

- **Elasticity**
Thanks to the properties of the polyurethane foam, these mattresses provide excellent support to the body during sleep, this is a precondition for a quality rest.
- **Anatomical effect**
Polyurethane foam is a gentle, elastic and soft material that can easily adapt to the shape of the human body and provide anatomical effects. It can with stand high pressure, to match people with higher body weight.
- **Orthopedic effect**
Foam mattress gives excellent support to the spine. During sleep the remains in the anatomic position. Those mattresses recommended to a healthy, or the people with deformities and other spinal disorders.
- **Ventilation**
Polyurethane foam is a material has a high permeability, important for the smooth ventilation of mattresses and hygiene.
All fabrics undergo heat treated thus obtained the properties of antibacterial products.

MATTRESSES WITH POCKET SPRINGS

Pocket spring core represent advanced technology of spring wire core. The spring are assembled into a single unit with a special procedure of sewing. Each spring is located in separated pocket. This way the spring is independently responding to pressure, without impacting the rest of the springs.

Matisan's pocket spring mattresses core can be made as single zone or 7 zones. This kind of zone effect is achieved by the use of different thicknesses springs. This kind of mattress enables ideal body position during sleep. It provides maximum comfort and best orthopedic effect.

Benefits of the pocket spring core:

Independent structure of the pocket spring core enables the best airflow, this way the mattress has a very good ventilation. This create an optimal microclimate for the person using the mattresses.

Pocket spring core has a priority over the wire spring core because of a severe orthopedic effect.

Pocket spring core mattresses are elastic. They provide an excellent body support in certain zones, adjusting to the shape of the human body. They show a high degree of anatomical effect.

All fabrics undergo heat treatment thus obtaining the properties of antibacterial products.

MATTRESSES WITH BONNELL SPRINGS

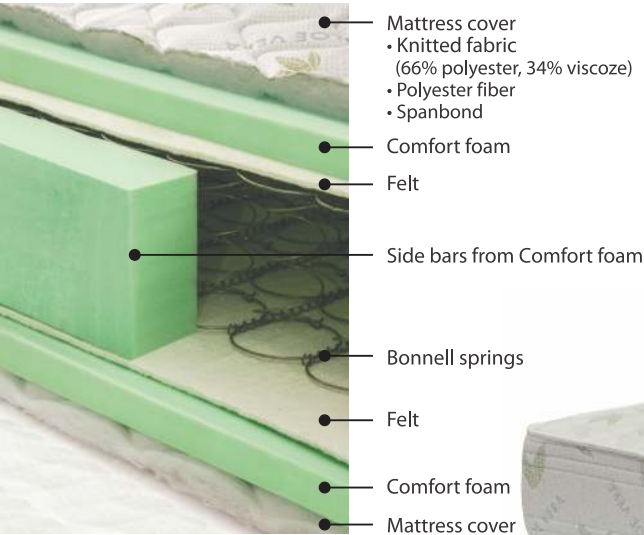

There is mattress for all of those who prefer traditional solution. The core of this mattress is consisted of a classic bonnell type spring. All springs are connected and join work together. By one side this provides reliable support, but other side gives negative effect of wave oscillation.

In order to be more comfortable and soft this mattress core father covered with different elastic materials. There are polyurethane foam and polyester or cotton fibers. Bonnell springs has orthopedic affect and provide an air circulation, thus ensuring durability of the mattress itself. There is good solution for the hotels.

All fabrics undergo heat treatment thus obtaining the properties of antibacterial products.

LEGEND

- Technological process- the polyurethane foam as a final product complies with EU standards for environmental protection .Tested and approved by the association of manufacturers of polyurethane foam CertiPUR® .

- Comfort foam –the foam with open cells that allow continuous flow of fresh air and prevent mold and dust mites. Healthy sleep is guaranteed throughout the period of use.

- HR (High Resilience) foam - material with exceptional relationship between strength and flexibility. Known also as cold foam, due to the specific chemical structure has a very high elasticity. Ideal support for a perfect rest time. HR foams are a product of the future and the expansion of the use of this type of material is still expected.

- Memory foam - Symbol of extremely healthy and restful sleep. Material originated in NASA laboratories. Special features of Memory Foam allow perfect adjustment of the mattress to the body.

- Bonnell springs core - Standard mode of production for those who like more traditional solutions. The design is made of high quality and long lasting springs. The box is coated with the best materials achieving a remarkable level of comfort.

- Pocket spring core - Improved technology of spring box production, the springs are assembled into a single unit with special stitching. Each spring is located in a separate "pocket" and so can independently withstand pressure without affecting the rest of the springs. For these mattresses, springs used are made of wires of the smaller diameter, so that a greater number of softer springs per unit area can provide greater comfort.

- Block 7 zoned core - Provides optimum support for human body in the areas of greatest pressure. Great anatomical and orthopedic effect due to ideal adjustment of the mattress to the body shape.

- Confidence in Textiles - All fabrics have a prestigious European certification Oeko-Tex 100, as a confirmation of the highest standards. No HTR/11597. No 0910054

- The hypoallergenic cover - High-quality material that exhibits excellent antibacterial characteristics.

- Fabric with Aloe Vera extract.

- Certificate of Compliance with EU Regulations.

- 3D fabric

- Latex

- Natural material. Coconut fiber in the mattress composition as an additional reinforcement.

- Natural material. Made from cellulose eucalyptus with thermoregulation properties.

- Silver ions fabric

- Removable cover

- To be washed at 30°.

- Orthopedic support - Ensures proper physiological position of the spine, as well as a high level of support to the spine.

- Anatomical effect – Characteristic of the mattress to adapt to shape of human body and reduce the pressure of the mattress to the human body. This stimulates blood circulation, lymph circulation and innervations of muscles, joints and internal organs.

- The height of the mattress

- The height of the mattress core

- Rolo-Transport in rolled condition. Dimension 180x200 is not Roloed.

- Warranty 2 years on the foam, pocket spring and bonnell springs.

- Recommended weight markings

H2 55 to 80 kg

H3 80 to 100 kg

H4 100 to 120 kg
